99-01.3-08-01. Twenty-one.

1. "Twenty-one" is a card game in which a player tries to obtain a higher total card count than a dealer without exceeding twenty-one. An ace counts either one or eleven. A king, queen, and jack have a count of ten. Cards two through ten are counted at their face value.
2. A maximum of seven players may play at a table. A player may play up to two betting spaces if an adjacent betting space is available. An outsider may not wager on a player's hand and a player may not wager on another player's hand.

History: Effective May 1, 1998.

General Authority: NDCC 53-06.1-01.1

Law Implemented: NDCC 53-06.1-01.1, 53-06.1-10

99-01.3-08-02. Table, drop box, cards, and dealing shoe.

1. If there is more than one table at a site, a table must have a number. A table playing surface must display no more than seven separate betting spaces and these statements:

BLACKJACK PAYS 3 TO 2
and

DEALER MUST STAND ON 17 AND MUST DRAW TO 16
or

If a site allows the dealer to take a hit card when the dealer has a soft seventeen:
BLACKJACK PAYS 3 TO 2

and
DEALER MUST HIT SOFT 17

2. A table must have a drop box that meets the specification of subsection 5 of section 99-01.3-15-02. If there is more than one table at a site, a drop box must have a number matching the table number. A drop box must have a money plunger which must remain in the slot unless the plunger is used to insert currency or forms.
3. The cards must be four, six, or eight decks and be dealt from a dealing shoe located at a dealer's left. The cards must be the same size, shape, design, and be jumbo-faced. However, if a mechanical or electronic hole card reader is used on a table, cards that are not jumbo-faced may be used provided that the organization has received approval from the attorney general. Approval must be based on the attorney general's evaluation of the clarity of the cards on a recorded video of activity for the table. The color of the backs of all decks must be one predominate color, or one-half of the number of decks must be one predominate color and the other decks a different predominate color. The design on the back of each card must be identical.
4. A dealing shoe must hold four or more complete decks of playing cards.

History: Effective May 1, 1998; amended effective July 1, 2000; July 1, 2002; October 1, 2006.

General Authority: NDCC 53-06.1-01.1

Law Implemented: NDCC 53-06.1-01.1

99-01.3-08-03. Casino chips.

1. A wager and tip must be made with chips. If an organization accepts a twenty-five dollar wager, it shall provide twenty-five dollar chips to players for their optional use. Chips may be issued in values of fifty cents, one dollar, two dollars, five dollars, and twenty-five dollars. An organization may use a fifty cent metal coin or fifty cent United States coin as a substitute for a fifty cent chip provided the coin produces sufficient clarity on video surveillance. Except for a commemorative chip, an organization may not use a different chip of the same value at a site.
2. Each chip must be one and nine-sixteenths inches [39.62 millimeters] in diameter and be permanently impressed, engraved, or imprinted on one side with an organization's name and on the other side with the value of the chip. The name may be represented by a unique identification that differentiates an organization's chips from all other organizations' chips. If a site had twenty-one gross proceeds averaging ten thousand dollars or more for two consecutive quarters and this level of activity is expected to continue or an organization installs a video surveillance system at a site, regardless of the value of wagers accepted at the site, the chips

must meet the specifications of subsection 3. If video surveillance is not required, an organization may use a fifty cent United States coin as a substitute for a fifty cent chip or fifty cent metal coin.

3. Each value of chip must have the following prescribed primary color. Except for a fifty cent chip or metal coin, a chip also must have one or two contrasting secondary colors as edge spots. Edge spots must be visible on the perimeter of both sides of a chip and on the chip's circumference. An organization may not use a secondary color on any value of chip that is identical to the primary color used by the organization on another value of chip that results in a reversed combination of primary and secondary colors between the two values of chips. The primary colors and edge spots must be:
 - a. Fifty cent mustard yellow chip - a fifty cent chip has no edge spots. A fifty cent metal coin or fifty cent United States coin may be used as a substitute for the fifty cent chip.
 - b. One dollar white chip - a one dollar chip must have four solid edge spots and each edge spot must be one-half of one inch [12.7 millimeters] in width.
 - c. Two dollar pink chip - a two dollar chip must have four split edge spots and each edge spot must be three-eighths of one inch [9.40 millimeters] in width. Each of the two split portions of an edge spot and the space between the two split portions must be one-eighth of one inch [3.05 millimeters] in width. The two split portions of an edge spot must be the secondary color and the middle space may either be the primary color or a third color.
 - d. Five dollar red chip - a five dollar chip must have six solid edge spots and each edge spot must be one-quarter of one inch [6.35 millimeters] in width.
 - e. Twenty-five dollar green chip - a twenty-five dollar chip must have eight white solid edge spots and each edge spot must be five thirty-seconds of one inch [4.06 millimeters] in width or, if the center of the chip is embossed in gold or inlaid with a coin, the chip must have three white solid edge spots and each edge spot must be fifteen thirty-seconds of one inch [12.18 millimeters] in width.
 - f. One hundred dollar black chip - a one hundred dollar chip must have four white triple split edge spots and each edge spot must be one-half of one inch [12.7 millimeters] in width. Each of the three split portions of an edge spot and the two spaces between the three split portions must be about three thirty-seconds of one inch [1.52 millimeters] in width. This chip is used in the game of paddlewheels.

4. An employee shall safeguard chips in a safe place or on a table with a locking cover. If a table has been opened and no employee is stationed at it, an employee shall remove or secure the chip tray with a locking cover.

History: Effective May 1, 1998; amended effective July 1, 2000; July 1, 2002; July 1, 2004; October 1, 2006.

General Authority: NDCC 53-06.1-01.1

Law Implemented: NDCC 53-06.1-01.1, 53-06.1-10

99-01.3-08-04. Video surveillance system. If a site had twenty-one gross proceeds averaging ten thousand dollars or more per quarter for two entire consecutive quarters, this level of activity is expected to continue, and wagers exceed two dollars, an organization shall have a video surveillance system operational at the site within forty-five days from the end of the second quarter. However, for a site with seasonal activity, this level of activity is based on the average gross proceeds of the active quarters within the fiscal year July first through June thirtieth. A level of activity is based on a site's recent historical experience, but not earlier than the previous fiscal year, regardless of which organization conducted twenty-one at the site. If an organization conducts twenty-one at a newly acquired site that has a level of activity requiring a video surveillance system, it shall have the system for a table operational within forty-five days of conducting twenty-one or limit wagers to two dollars until the system is operational. A system must be operational for each twenty-one table that is regularly located on a site, regardless of how infrequent a table is used or the value of wagers accepted at the table. A temporary table that is brought onto a site for fourteen or fewer consecutive days for a special event according to subsection 4 of section 99-01.3-01-02, but for not more than two events per quarter, does not need a system. An organization shall:

1. Install a system that meets these specifications:
 - a. A recording unit must be a super VHS (S-VHS) system utilizing super VHS (S-VHS) videotapes or a digital video recorder (DVR) system and must record in real time. A video system must be approved by the attorney general and no time lapse or multiplex video recorders may be used as the primary mode of operation. A recording unit must be secured in a locked cabinet or area, plugged into an outlet that cannot be switched off, and be programmable with a minimum seven-day memory backup. A recording unit must have a built-in or separate time and date generator that displays the time and date on the recorded video without significantly obstructing a recorded picture. A playback unit used to review a recorded video must have forward and reverse frame-by-frame and high-speed scanning capability;
 - b. A super VHS or high resolution color camera that has four hundred or more active lines of horizontal resolution must be used. A camera must have a signal to noise ratio, with the automatic gain

circuitry off, of forty-five decibels or better. A camera must be positioned above the center of a table and record gaming activity from the dealer's perspective. A camera must be plugged into a surge protector and use an outlet that cannot be switched off. A camera must be protected by a slotted or clear dome. An automatic iris is optional;

- c. A camera lens must have an f-stop rating of f-1.2 or better, be color-corrected and have a format size equal to or greater than the format size of a camera. A lens may be fixed or variable focus. A lens must have a field of view to record the face of a dealing shoe, all betting spaces, discard holder, chip tray, currency plunger, and table number;
 - d. A color video monitor with a connection that produces lines of horizontal resolution that equal or exceed the number of active lines of horizontal resolution that a video camera is outputting. A monitor's screen must measure at least thirteen inches [330.2 millimeters] diagonally; and
 - e. For a super VHS color camera, super VHS YC or coaxial video cable must be used. For a high resolution color camera, coaxial video cable must be used. The cable must meet these specifications:
 - (1) If the length of a cable is one hundred linear feet [30.48 linear meters] or less and the cable will not be flexed, exposed outside a building, or constantly moved, the center conductor must be stranded or solid pure copper material. Otherwise, the center conductor must be stranded pure copper material.
 - (2) The shield must be braided pure copper material. The dielectric must be foam material. A cable must be rated for seventy-five ohms of impedance. If a cable is to be placed in a return air system, the jacket must be teflon or other accepted fire-rated material.
2. Buy or lease qualifying items. Additional allowable expense funds may be used for only these qualifying items:
- a. Super VHS video cassette recorder (VCR), central processing unit (CPU), digital video recorder (DVR), time and date generator, and locking vented enclosure;
 - b. Super VHS, digital, or high resolution color camera with a fixed or zoom lens and dome;
 - c. Super VHS or high resolution color video monitor;

- d. Super VHS YC or coaxial video cable;
 - e. VCR, CPU, or DVR cabinet, super VHS tapes or computer hard drives, and related storage cabinet;
 - f. Table number and site identification;
 - g. Installation and maintenance of equipment, including lighting fixture;
 - h. In-line video cable amplifier, surge protector, video printer, tape rewinder, battery backup, and tape eraser; and
 - i. Lease payment and interest expense on a financing loan.
3. If an organization conducts twenty-one or paddlewheels at more than one site, a table must have a site identification. A site identification and any table number must be visible on a recorded video.
 4. A playing surface must be the standard green. Red or maroon and black jumbo-faced playing cards may be used.
 5. Maintain a clean dome and a proper field of view on the playing surface.
 6. Authorize only a gaming or shift manager or an independent person to:
 - a. Access a recording unit, camera, and stored recorded video;
 - b. Start and stop a recording unit for a table when chips are first made available for use on the table and continue recording until the table is permanently closed for the day; and
 - c. Change a recorded video in a recording unit for a table at the beginning, during, or at the end of a day's activity, regardless if the authorized person is a dealer or wheel operator at the site. An organization may use two real time recorders in sequence to record a table's activity that exceeds the recording capability of one tape. If two recorders are used for one table, their separate recordings for a day's activity must overlap by ten minutes.
 7. Retain a recorded video in a safe storage place for thirty days.
 8. On a daily basis an employee shall review and document that a surveillance camera at each twenty-one and paddlewheel table at a site is recording an unobstructed view of the table activity. If a recording unit or camera for a table is not properly operating or not producing an unobstructed view and clear picture of the cards, currency, or chips and is not repaired or remedied within seventy-two continuous hours,

the organization shall close the table or limit wagers to two dollars on the table until the equipment is repaired.

9. Use the attorney general's current recordkeeping system unless approval is obtained from the attorney general for use of another system. An organization shall track a dealer's and wheel operator's percent-of-hold performance. Percent-of-hold is computed as adjusted gross proceeds divided by gross proceeds.
10. Limit its purchase or lease of a camera, lens, cable, camera dome, digital recording device, time and date generator, and installation, including moving a camera to another site, to a vendor approved by the attorney general. An organization shall defer remitting at least fifty percent of the cost or lease price of this equipment to a vendor until the attorney general approves the clarity of the recorded video for a table. A vendor shall provide the attorney general with a sample recording to evaluate. If an organization acquires video surveillance equipment at a new site from another organization, moves a camera or table to another location at the site, or converts to a digital video recorder (DVR), the organization shall, within fourteen days, provide the attorney general with a sample recorded video to evaluate. If the quality of the sample tape is not satisfactory, an organization and vendor shall resolve the deficiency. An organization may buy or lease a qualifying item from another organization provided the equipment meets the specification of subsection 1.

History: Effective May 1, 1998; amended effective July 1, 2000; July 1, 2002; July 1, 2004; October 1, 2006.

General Authority: NDCC 53-06.1-01.1

Law Implemented: NDCC 53-06.1-01.1, 53-06.1-10, 53-06.1-11

99-01.3-08-05. Distributing and removing chips.

1. A fill slip must be used to distribute casino and betting chips from a chip bank to a table and a credit slip to return chips from the table to the chip bank. An organization may not transfer or exchange chips directly between two tables. An organization shall use a fill and credit slip to temporarily transfer a chip tray to or from a table and jar bar. Access to a fill and credit slip must be restricted to an authorized person. The same fill and credit slip format may be used for both twenty-one and paddlewheels.
2. A fill slip and credit slip must be separate forms. Fill and credit slips must be mechanically or electronically consecutively prenumbered two-part carbonless forms, be used in sequential order, and be all accounted for. Originals and copies of voided fill and credit slips must be marked "VOID" and be initialed by the preparer.

3. A fill slip must be prepared by a chip bank cashier, pit boss, or shift manager. A credit slip must be prepared by a dealer, wheel operator, pit boss, or shift manager. The original and copy of a fill and credit slip must contain:
 - a. Reference to twenty-one (21) or paddlewheels (PW), site, date and time (including a.m. or p.m.), and a table number;
 - b. Quantity and total value of chips, by value, and grand total value of chips; and
 - c. For a fill slip, the initials of a chip bank cashier. However, if a dealer is the only employee on duty, this person shall initial the fill slip. For a credit slip, the initials of a dealer or wheel operator.
4. After preparation of a fill slip, a chip bank cashier shall retain the original. However, if a dealer is the only employee on duty, this person shall retain the original. After preparation of a credit slip, a dealer or wheel operator shall deposit the original in a drop box.
5. If an organization has a shift manager or authorized employee on duty who is not presently dealing or operating a paddlewheel, this person shall verify the quantity and value of the chips, initial the original part of the fill or credit slip, and transfer the copy of the fill slip with the chips to a table, or transfer the copy of the credit slip with the chips to a cashier.
6. A dealer or wheel operator shall verify the information on the copy of a fill slip and, if correct, initial and deposit it in a drop box. A cashier shall verify the information on the copy of a credit slip and, if correct, initial and retain it. However, if a dealer is the only employee on duty, the dealer shall retain the copy of a credit slip.
7. As an option, an organization may have:
 - a. A dealer or wheel operator initial the original part of a fill slip before it is retained by a chip bank cashier; and
 - b. A chip bank cashier initial the original part of a credit slip before it is retained by a dealer or wheel operator.

History: Effective May 1, 1998; amended effective July 1, 2000; July 1, 2002; July 1, 2004.

General Authority: NDCC 53-06.1-01.1

Law Implemented: NDCC 53-06.1-01.1

99-01.3-08-06. Chip bank services.

1. An organization shall sell casino chips at a table only for cash, no checks. A chip may be exchanged for a paddlewheel betting chip at

a paddlewheel table. Checks may be cashed by a cashier. Cash for chips sold must be kept separate from all other cash until it has been counted. Only a two-person audit team may access a drop box before the drop box cash count.

2. An organization shall redeem a chip for cash at the value for which it was sold, except when a chip was obtained or used unlawfully. An organization shall adopt a procedure on redeeming a player's chips that ensures that redeemed chips are separated, by value, and counted accurately. A cashier may use a rack to account for one or more sets of twenty chips of the same value. If an organization discontinues twenty-one or paddlewheels at a site, it shall redeem its chips, at its business office or active site, for thirty days thereafter. An employee shall redeem a dealer's and wheel operator's tips through cash on hand. Unless a table has a video surveillance system, a dealer and wheel operator shall redeem the actual chips received as tips. This rule does not prohibit pooling of tips.
3. An employee may not take any chip, including tips, to a location outside the gaming area of a site. A dealer shall redeem tips before leaving a site.

History: Effective May 1, 1998; amended effective July 1, 2000; July 1, 2002.

General Authority: NDCC 53-06.1-01.1

Law Implemented: NDCC 53-06.1-01.1, 53-06.1-10

99-01.3-08-07. Opening a table and accepting cash and chips.

1. When playing cards are brought to a table, a dealer shall first approve all decks of cards. Decks must be sorted into sequence, by suit and the back of each card inspected to assure that all cards are present and none are marked, taped, bent, crimped, cut, or shaved. After approval, a dealer shall spread the cards face upwards on a table, by deck, according to suit and in sequence within the suit for review by the first player. After a player's review, the cards must be shuffled. If cards are removed from a table for any reason, they must be stored in a safe place and a dealer shall comply with this subsection when the cards are brought back to the table. If a table has been opened and no dealer is stationed at it, a dealer shall remove the cards from the table or place the cards in a discard holder or dealing shoe and securely cover them.
2. A dealer or shift manager shall inspect each dealing shoe before each day's activity. If a shoe is removed from a table for any reason, it must be stored in a safe place. If a table has been opened and no dealer is stationed at it, a dealer shall securely cover the shoe or remove the shoe from the table.
3. A dealer, upon receiving currency or chips from a player, shall:

- a. If an organization has not installed a video surveillance system at a site, spread the currency on top of a table in full view of the player and shift manager and state the amount of currency in a voice loud enough to be heard by all players at the table. A dealer shall then take chips from a chip tray, equal in value to the currency, place the chips in a stacked manner in the inner table area with only the dealer's right hand, fan the chips, push the chips to the player and place the currency in a drop box; or
- b. If an organization has installed a video surveillance system at a site, spread each bill of currency face down and flat, in sequence of denomination, in the inner table area, perpendicular to a chip tray, and momentarily move the dealer's hands away from the currency so the currency is within a camera's view. A dealer shall then take chips from a chip tray, equal in value to the currency, place the chips in a stacked manner in the inner table area with only the dealer's right hand, fan the chips, and momentarily move the dealer's hands away from the chips so the chips are within a camera's view. A dealer shall then restack the chips, and push the chips to a player, and place the currency in a drop box.
- c. If a chip is received from a player to be exchanged for smaller value chips, the dealer shall place the payout chip in the inner table area at the dealer's left, sort, stack, and fan the chips. If the table has a video surveillance system, a dealer shall momentarily move the dealer's hands away from the chips so they are within a camera's view. A dealer shall then take twenty-one chips from the chip tray, equal in value to the chips, and fan the chips. If the table has a video surveillance system, a dealer shall momentarily move the dealer's hands away from the chips so they are within a camera's view. A dealer shall then restack the chips, push the chips to the player, and place the exchanged chip in the chip tray.

History: Effective May 1, 1998; amended effective July 1, 2002.

General Authority: NDCC 53-06.1-01.1

Law Implemented: NDCC 53-06.1-01.1

99-01.3-08-08. Shuffle and cut of the cards.

1. Before starting play, and after each shoe of cards is dealt, a dealer shall, in front of the players, thoroughly shuffle all the cards. As an alternative to a dealer hand shuffling the cards, an organization may use an automatic card shuffling device which complies with section 99-01.3-16-09.3. Then, a dealer shall offer the stack of cards, with backs facing away from the dealer, to a random player to be cut. A player shall cut the cards by placing a cutting card in the stack at least ten cards in from either end. A dealer shall rotate the opportunity to cut the cards among all the players. If all players decline, a dealer or pit boss shall cut the cards. For a site with a video surveillance system, an

organization shall standardize its dealers' procedures for shuffling and cutting cards and may use one or more standard shuffling methods.

2. A dealer shall take all the cards in front (toward the dealer) of a cutting card and place them in back of the stack or take all the cards in back (away from the dealer) of the cutting card and place them in front of the stack. The cutting card must be at the bottom of the stack. A dealer shall then insert an indicator card about fifty to one hundred cards from the bottom of the stack. The stack is inserted into a dealing shoe facedown. When an indicator card appears at the face of a shoe and enough cards have been dealt to complete the present hand, a dealer shall reshuffle the cards. A dealer may reshuffle the cards only if the indicator card appears, no activity has occurred at the table for a period of time set by the organization, or a table has been temporarily closed with no dealer stationed at the table and it is reopened.

History: Effective May 1, 1998; amended effective July 1, 2002; July 1, 2004; October 1, 2006.

General Authority: NDCC 53-06.1-01.1

Law Implemented: NDCC 53-06.1-01.1

99-01.3-08-09. Betting.

1. An original wager must be an even dollar amount and may range from one dollar to twenty-five dollars. A wager of one dollar must be accepted unless an organization has more than one active table then a minimum wager may be set on no more than one-half of the tables. An active table under this subsection means a table in which a dealer and chips are present and available for play or has one or more players participating in the game. An organization may establish a maximum wager for each table. If all the tables at a site do not have the same betting limit, a plaque must be placed on top of a table indicating the minimum and maximum wager for the table. If a table that has a minimum wager becomes the only active table at a site or more than one-half of the active tables have a minimum wager, then the organization must notify players that the minimum wager amount will be lowered to a wager of one dollar at the end of the current dealing shoe. A wager that exceeds the maximum wager is valued at a table's maximum wager and the excess must be returned to a player. An organization shall post and announce a change in the maximum wager at a table with adequate notice to a player.
2. An original wager is the amount bet per hand before the first card is dealt and excludes tip betting. After the first card has been dealt, no original wager or tip bet may be changed. A separate wager may be a split, double-down, insurance bet, and tip bet.
3. Splitting is permitted on any pair or any two 10-count value cards. A player is allowed a maximum of four hands per betting space. A

player's right-hand card in a split must be played to completion before the adjacent split hand is dealt a second card. A player shall take at least one card on a split hand. A wager on each hand must equal the original wager. Split aces draw only one card each. A two-card twenty-one after a split is not a natural twenty-one.

4. Doubling-down is permitted on the first two cards dealt to a betting space or the first two cards of a split hand, except on split aces. An organization may require a double-down wager to equal the original wager or allow a double-down wager to be equal to or less than the original wager. Only one additional card is dealt.
5. An organization may permit insurance betting except on a tip wager. An insurance bet is placed when a dealer's faceup card is an ace and it must be one-half the original wager. The payoff on a winning bet is two to one.
6. An organization may permit tip betting and doubling-down on tip bets. A tip bet is made when the original wager is made by placing a chip outside a betting space, but with the chip touching the lower left edge of the betting space, from a dealer's perspective. A betting space is limited to one tip bet. A tip bet does not have to equal an original wager and may range from fifty cents up to a table's maximum wager, but may be limited to less than the table's maximum wager at an organization's option. A doubled-down tip bet may be equal to or less than the original tip bet. If a player's hand wins, a tip bet is paid off at an equal amount and the tip bet and payoff are placed in a dealer's tip receptacle. If the dealer's hand wins, a tip bet is placed in the chip tray. If a player's and dealer's hands tie, a tip bet is a standoff (push).
7. If a player's wager consists of two or more values of chips, a player shall neatly stack the lowest value chip on top of the highest value chip. If the chips are improperly stacked, a dealer shall tell the player and either the dealer or player shall properly stack the chips.

History: Effective May 1, 1998; amended effective July 1, 2000; July 1, 2002; July 1, 2004; October 1, 2006.

General Authority: NDCC 53-06.1-01.1

Law Implemented: NDCC 53-06.1-01.1, 53-06.1-10

99-01.3-08-10. Dealing.

1. After a shuffle, a dealer shall remove the first card face downwards and without showing its value, place it in a discard holder (burning a card) located at the dealer's right. Each new dealer at a table shall burn one card before dealing. If a table is open but there is no player, a dealer shall reshuffle the cards or burn one card when a player comes to the table. Only one of two dealing methods may be used at a site:

- a. Hole-card-no-peek method. A dealer may not look at the face of a hole card until after all cards requested by players are dealt. The cards must be dealt in this order:
 - (1) One card face upwards to each betting space with a wager.
 - (2) One card face upwards or face downwards (hole card) to a dealer.
 - (3) A second card face upwards to each betting space with a wager.
 - (4) A second card face upwards to a dealer if the first card was dealt face downwards; or, a second card face downwards to a dealer if the first card was dealt face upwards.
 - b. No-hole-card method. A dealer may not deal a second card (hole card) to the dealer until after all cards requested by players are dealt. The cards must be dealt in this order:
 - (1) One card face upwards to each betting space with a wager.
 - (2) One card face upwards to a dealer.
 - (3) A second card face upwards to each betting space with a wager.
2. A dealer shall, starting on the dealer's left, deal the cards by removing them from a dealing shoe with the left hand, turning them face upwards and with the right hand place them on the proper area of a playing surface; however, a dealer may deal cards to the first two betting spaces with the left hand. A player's second card and any hit card must be placed on top of the preceding card covering no more than the lower left-hand quarter of the preceding card, from the dealer's perspective. This rule does not apply to a disabled dealer.

History: Effective May 1, 1998.

Law Implemented: NDCC 53-06.1-01.1

99-01.3-08-11. Playing.

1. After the first two cards have been dealt to each betting space and if a dealer's faceup card is an ace, the dealer shall ask the players if they desire to make an insurance bet. A player shall make an insurance bet by placing a chip on the insurance line of the playing surface. A dealer shall reposition the chip below the lower right-hand corner of the first card dealt and to the immediate right of the second card dealt, from the dealer's perspective. A dealer shall then announce "insurance

bets are closed". However, if a player who has been dealt a natural twenty-one (blackjack) desires to make an insurance bet and does not desire to double-down, a dealer may, at an organization's option, do an even money payoff rather than having the player place an "insurance" bet. To exercise this option, a dealer shall state "even money" and immediately do a chip payoff to a player equal to the player's original wager. This even money payoff must be done according to subdivision a of subsection 16. A dealer shall then place the player's cards in a discard holder. For this option, a tip bet is a standoff (push). This rule does not apply if an insurance bet is not permitted.

2. A dealer may announce the dealer's faceup card one time to all the players at a table. If the dealer is using the hole-card-no-peek method of dealing, the dealer's faceup card is an ace or a ten-count card, the dealer is using a mechanical or electronic hole card reader and special cards, and the dealer's hand is a natural blackjack, the dealer shall play the dealer's hand as prescribed by subdivision c or d of subsection 10. Otherwise, a dealer shall, beginning from the dealer's left and for each player's hand, prompt a player to indicate whether the player desires to split or double-down, or both. As a prompt, a dealer may announce the point total of each player's hand. For splitting a hand, a player shall place an additional wager, equal to an original wager, horizontal to the original wager. For doubling-down on an original wager or tip bet, a player shall place a chip vertical to the wager. A player may not double-down on a tip bet unless the player also doubles-down on the original wager. If a dealer is unsure of a player's intent, the dealer shall ask the player and properly reposition a chip.
3. If a player has split or doubled-down, or both, a dealer shall play each hand as follows:
 - a. When a player places a wager for a split, a dealer shall split the cards side by side. If a player has also placed a tip bet, a dealer shall assign and reposition the tip bet to the split hand located at the foremost left of a betting space, from the dealer's perspective. Each split hand must be played separately. If aces are split, one additional card must be dealt face upwards to each of the hands and placed at a right angle to the first card dealt.
 - b. A doubled-down hand must be dealt one additional card face upwards and placed at a right angle to the first two cards dealt. However, if a table does not have a video surveillance system, the card may be placed beneath a player's original wager.
4. A dealer may not take a hit card from a dealing shoe nor may a dealer bypass a player unless the player has first indicated the player's request for a hit card or to stand by a distinct hand signal.

5. As a player indicates to stand or draw a hit card, other than on a hand that has split aces or a double-down, a dealer shall deal face upwards an additional card or cards as the player requests. A player is responsible for correctly computing the total card count of the player's hand.
6. If a player did not split, double-down, or place an insurance bet, and busts (a player's total card count exceeds twenty-one), the player loses an original wager and any tip bet. A dealer shall immediately collect and place a player's chips, including any tip bet, in a chip tray and the cards in a discard holder.
7. If a dealer's faceup card is not an ace or a ten-count card and a player split or doubled-down and busts, the player loses the wager for that split or double-down hand and any tip bet assigned to it. A dealer shall immediately collect and place a player's chips in a chip tray and the cards in a discard holder.
8. If a dealer's faceup card is an ace or a ten-count card and a player split, doubled-down, or placed an insurance bet and busts, the dealer shall gather the cards of that hand and place them outside the betting space. Then, a dealer shall reposition the player's split and or doubled-down wagered chips, in the same betting position, on top of the player's cards of that hand. A tip bet for such a split or double-down hand that busts is lost. A dealer shall immediately place the tip bet chips in a chip tray.
9. If a dealer's faceup card is not an ace or a ten-count card and all players bust, a dealer shall end the round. If a dealer's faceup card is an ace or a ten-count card and all players bust, and no player split, doubled-down, or placed an insurance wager, a dealer shall end the round.
10. If the decisions of all players have been carried out, a dealer shall turn up the dealer's facedown card (hole-card-no-peek method) or deal a second card face upwards to the dealer (no-hole-card method). However, for the no-hole-card method, a dealer shall remove the dealer's second card from a dealing shoe and, without looking at the value of the card, place it beside the dealer's first card. Then, a dealer shall announce the total card count of the two cards. A dealer shall play the dealer's hand as follows:
 - a. If a dealer's faceup card is an ace and the dealer's hand is not a natural twenty-one, the dealer shall immediately, starting with the player to the dealer's right and moving left around the table, collect all the players' insurance bet chips, with the dealer's right or left hand, in a sweeping motion, and place them in a chip tray. A dealer may not use the right and left hand at the same time. Then, for all the players' busted hands that have been split, doubled-down, or both, a dealer shall immediately, starting with the player to the dealer's right and moving left around the table, collect the chips of busted hands, with the dealer's right or left hand, in a sweeping

motion. A dealer may not use the right and left hand at the same time. When no other busted hand remains, a dealer shall place the collected chips in a chip tray, collect those players' busted hands, and place the cards in a discard holder. A dealer may, at an organization's option that is consistently applied at a site, collect each player's insurance bet chips and busted hands and related chips with only the dealer's right hand, on a hand-by-hand basis, and place the chips in a chip tray and the cards in a discard holder. Then, for all the players who have been dealt a natural twenty-one, the dealer shall immediately, starting with the player to the dealer's right and moving left around the table, do the payoff according to subsection 15 or 16, and collect and place those players' cards in a discard holder. If a player's hand remains in play, a dealer shall proceed according to subdivision f or g, and do the payoff procedure on any winning hand according to subsection 15 or 16.

- b. If a dealer's faceup card is a ten-count card and a dealer's hand is not a natural twenty-one, for all the players' busted hands that have been split, doubled-down, or both, the dealer shall immediately, starting with the player to the dealer's right and moving left around the table, collect the chips of busted hands, with the dealer's right or left hand, in a sweeping motion. A dealer may not use the right and left hand at the same time. When no other busted hand remains, a dealer shall place the collected chips in a chip tray, collect those players' busted hands and place the cards in a discard holder. A dealer may, at an organization's option that is consistently applied at a site, collect each player's busted hands and related chips with only the dealer's right hand, on a hand-by-hand basis, and place the chips in a chip tray and the cards in a discard holder. Then, for all the players who have been dealt a natural twenty-one, the dealer shall immediately, starting with the player to the dealer's right and moving left around the table, do the payoff according to subsection 15 or 16, and collect and place those players' cards in a discard holder. If a player's hand remains in play, a dealer shall proceed according to subdivision f or g, and do the payoff procedure on any winning hand according to subsection 15 or 16.
- c. If a dealer's faceup card is an ace, the dealer's hand is a natural twenty-one, and a player has placed an insurance bet, the player wins the insurance wager at the rate of two to one. A dealer shall do the payoff procedure according to subsection 15 or 16. However, if a player's original hand also is a natural twenty-one, subdivision d also applies.
- d. If a dealer's faceup card is an ace or a ten-count card and the dealer's hand is a natural twenty-one, the organization wins all original wagers and original tip bets, unless a player's original hand also is a natural twenty-one which results in a standoff. All other players lose.

- e. If a player has doubled-down or split against a dealer's faceup card of an ace or a ten-count card and the dealer's hand is a natural twenty-one, only the player's original wager is lost unless the player's original hand also is a natural twenty-one which results in a standoff. All separate splitting and doubling-down wagers are voided. A dealer shall return the chips of the separate wagers to the players.
 - f. If the count of a dealer's hand is sixteen or under, the dealer shall draw a hit card until the count exceeds sixteen. An additional card must be dealt face upwards to the immediate right of a dealer's first two cards dealt, from the dealer's perspective, and the dealer shall announce the total card count.
 - g. If the count of a dealer's hand exceeds sixteen but does not exceed twenty-one, the dealer shall stay (not draw a hit card). At its option, an organization may permit a site to allow a dealer to take a hit card when the dealer has a soft seventeen (ace card and a six). If the organization allows this option, it must be posted at the site. If a dealer's hand contains an ace and a count of seventeen, eighteen, nineteen, twenty, or twenty-one can be obtained by counting the ace as an eleven, a dealer shall value the dealer's hand as such and stay. A dealer shall announce the final total card count of the dealer's hand.
 - h. If a dealer's hand busts, the remaining players with active hands win.
- 11. If a player's original hand is a natural twenty-one and a dealer's faceup card is not an ace or a ten-count card, the player's hand wins and is paid off at a rate of three to two, unless the player chooses to double-down. A dealer's chip payoff on a player's wager may occur immediately or when the dealer, in the order of hands, comes to that player's hand.
 - 12. A wager is won or lost by comparing the total card count of each player's hand to the dealer's hand. A dealer or player with the highest total card count wins. Wagers, including tip bets, are paid off at an equal amount according to subsection 15 or 16. All ties are a standoff - no payoff is made, including on a tip bet.
 - 13. If a player's hand loses against a dealer's hand, an organization wins any tip bet. A dealer shall immediately, starting with the player to the dealer's right and moving left around the table, collect the chips of adjacent losing hands with the dealer's right or left hand, in a sweeping motion. A dealer may not use the right and left hand at the same time. A dealer may, at an organization's option that is consistently applied at a site, collect the chips of losing hands with only the dealer's right hand, on a hand-by-hand basis. When a tie hand is reached, the dealer shall recognize that hand with a tap on the tabletop and announce that

it is a push. When a winning hand is reached, a dealer shall place any previously collected chips in a chip tray and do the payoff procedure for adjacent winning hands according to subsection 15 or 16. When a losing hand is again reached, the dealer shall repeat the collection and payoff procedure until all losing wagers have been collected and all winning hands have been paid. The dealer shall then collect all the remaining cards according to subsection 17.

14. If a player's hand wins against a dealer's hand and the player placed a tip bet, the dealer wins the tip bet and the one-to-one payoff from a chip tray according to subsection 15 or 16.
15. If a player's hand wins against a dealer's hand and a table does not have a video surveillance system, the payoff procedure is:
 - a. Normal hand. A payoff chip must be placed beside the original wagered chip in a betting space.
 - b. Split hand. The payoff chip must be placed beside the wagered chips in a betting space.
 - c. Double-down hand. The payoff chips must be placed beside the two wagered chips in a betting space.
 - d. Insurance bet. A payoff chip must be first placed beside the insurance bet chip, fanned, then placed on top of the insurance bet chip and the chips pushed to a player.
 - e. Natural twenty-one. The payoff chips must be pyramided with the higher value chip placed beside the original wagered chip in a betting space and the smaller value chip placed on top over the center of the other two chips.
 - f. Tip bet. A payoff chip must be placed beside the tip bet chip and any double-down chip in the inner table area. Then, a dealer shall place the chips directly in a tip receptacle.
16. If a player's hand wins against a dealer's hand and a table has a video surveillance system, the payoff of each winning hand must be done on a hand-by-hand basis. The payoff procedure is:
 - a. A dealer shall fan all of a player's wagered chips toward the dealer or side with only the dealer's left hand. A dealer may, at an organization's option that is consistently applied at a site, fan all of a player's wagered chips toward the dealer or side with only the dealer's right hand. However, for a site that has a pit boss on duty and the organization requires a double-down wager to equal the original wager, a dealer may, for a player who has placed a split bet or double-down bet, or both, fan only one of the player's

stacks of wagered chips. A dealer shall reposition a tip bet chip in the inner table area with the dealer's left hand and fan the chips. A dealer may, at an organization's option that is consistently applied at a site, fan all the players' tip bets and double-down chips after the payoff procedure has been done on all winning players' hands. However, if a player's bet exceeds five dollars, the dealer shall separate the player's chips, by value, fan them in sets of five chips, and then fan any remaining chips. A dealer shall, with the dealer's right hand, take a chip from a chip tray, equal in value to the player's wagered chips (not tip bet chips), place the payoff chip in a stacked manner beside the wagered fanned chips, fan the payoff chips toward the dealer or side, and move the dealer's hands away from the chips. However, if the prize payoff exceeds twenty casino chips of the same value, the dealer may use a rack to account for one or more sets of twenty chips and fan the remaining chips. A dealer shall repeat this procedure for each separate winning hand.

- b. After the payoff procedure has been done on all winning players' hands and the tip bet chips have been fanned, a dealer shall, with the dealer's right hand, take a chip from a chip tray of the same value as the tip bet chip, place the payoff chip in a stacked manner beside the fanned chips, and fan the payoff chips. A dealer shall repeat this procedure for each separate winning tip bet. Then, a dealer shall move the dealer's hands away from the chips. After a dealer has picked up the cards according to subsection 17, the dealer shall place the chips directly in a tip receptacle.
- 17. At the end of a round of play, a dealer shall pick up all the cards remaining on the playing surface so that they can be played back to recreate each hand, starting with the player to the dealer's right and moving to the left around the table. After the cards have been collected in a sweep or hand by hand, a dealer shall pick up the dealer's cards against the top of the players' cards and place them in a discard holder.
- 18. If a table has a video surveillance system, a dealer's shift ends, and the dealer:
 - a. Does not desire to exchange the dealer's tips for other chips in the chip tray, the dealer shall momentarily show both sides of the dealer's hands, with fingers extended, within a camera's view. A dealer shall then take the tip receptacle and leave the table.
 - b. Does desire to exchange the dealer's tips for other chips in the chip tray, the dealer shall take all the chips out of the tip receptacle. A dealer shall place the chips in the inner table area at the dealer's left; sort, stack, and fan only the chips to be exchanged; take chips from a chip tray equal in value to the fanned chips; place the replacement chips at the dealer's right; sort, stack, and fan the chips, momentarily move the dealer's hands away from the chips

so the chips are within a camera's view; place the exchanged chips in a chip tray; then place the replacement chips and unexchanged chips in a tip receptacle. A dealer shall then momentarily show both sides of the dealer's hands, with fingers extended, within a camera's view, take the tip receptacle, and leave the table. As an option, a dealer for the next shift may exchange the present dealer's tips.

19. A dealer may not allow a player to touch a card.
20. A dealer may not switch or remove a player's card or chip, pay on a standoff, or do anything to alter a fair and legal outcome of a betting hand.
21. An organization may adopt a policy to allow a dealer, when a player leaves a table, to exchange two or more of the player's casino chips for higher value chips provided that the dealer first asks the player's permission, the player agrees, and the dealer announces the value of chips being exchanged.

99-01.3-08-12. Dealing mistakes. Unless an organization has an alternative written policy, these procedures must be applied for dealing mistakes:

1. A card found turned face upwards in a dealing shoe must be burned.
2. If no cards are dealt to a player's betting space containing a wager, the betting space is inactive for the round. If only one card is dealt to a player's betting space, at the player's option, a dealer shall deal a second card to the player after all other players have received a second card. Otherwise, a player's betting space is inactive and the card dealt must be burned.
3. If a dealer deals a card to an inactive betting space and continues dealing cards to active betting spaces, the dealer shall burn the card dealt to the inactive betting space.
4. If a dealer misses dealing the dealer's first or second card, the dealer shall continue dealing the first two cards to each player, and then deal the proper number of cards to the dealer.
5. If a dealer does not ask a player if the player desires to place an insurance wager and the hand is played, the hand is valid.

6. If a dealer drops a player's or dealer's card off a table, the dealer shall burn the card.
7. A card drawn from a dealing shoe in error without the card's face being exposed to any player must be used as if it were the next card from the shoe.
8. After the first two cards are dealt to each player and a card is drawn from a dealing shoe in error with the card's face exposed to any player, the card must be burned.
9. If there is an insufficient number of cards remaining in a dealing shoe to complete a round of play, all of the cards in a discard holder must be shuffled and cut, the first card must be burned, and a dealer shall complete the round of play.
10. If a dealer has a count of at least seventeen and draws a hit card, the card must be burned.
11. If a dealer permits a player to wager an unlawful amount and the player's hand wins, the dealer shall return the improper portion of the wager to the player. A dealer shall value a player's hand at the proper wager for the payoff. However, if a dealer permits a player to wager fifty cents and is dealt a card, the dealer shall return the fifty cents to the player and burn the card.
12. After a round of play, if a dealer or player suspects that the dealer miscounted the dealer's hand, the dealer shall play back the cards.
13. If a dealer does not burn a card at the beginning of dealing a shoe, the dealer shall burn the card after the first complete round of play.
14. If a dealer's facedown card is exposed to any player before the decisions of all the players are carried out, the dealer shall burn the card and, after the decisions of all the players have been carried out, draw a new facedown card.
15. If a dealer misses dealing a player a hit card, the dealer shall continue dealing any requested hit cards to all other players and then deal a hit card to the player who was missed.

History: Effective May 1, 1998.

99-01.3-08-14. Drop box cash count.

1. A drop box that has been used must be removed from a table by the end of the day's activity. If a drop box is removed from a table and the cash is not counted immediately, the drop box must be transported by the shift manager and, if there is more than one employee on duty, escorted by

an employee to a safe storage place. The cash must be removed from the drop box before the drop box can be used for another day's activity. An empty drop box may be stored on a table or in a safe storage place.

2. A drop box must be opened by a two-person count team. The persons must be independent of each other. A count team may be an independent person and a gaming employee; two representatives of a financial institution, accounting firm, security agency, or security company; two nongaming employees; or two gaming employees provided they did not conduct games at the same site on the day of the gaming activity and day of the count. One of these two gaming employees may have conducted games at the site associated with the drop box cash. For other than independent contractors, a count team may not be two persons who have a direct supervisor and subordinate relationship and may not be a common household member, spouse, child, parent, brother, or sister of the other count team member.
3. The key to the lock securing the contents of a drop box must be controlled by one count team member who may not access the drop box unless both count team members are present. If there are two separate locks that secure the contents of a drop box, the key to the second lock must be controlled by the other count team member.
4. Each person shall independently count the drop box cash in the presence of the other person and resolve any difference between the two counts. Documentation of the count must be initialed and dated by both count team members.
5. An organization shall comply with this rule unless it uses another drop box cash count procedure that has been approved by the attorney general.

History: Effective May 1, 1998; amended effective July 1, 2000; July 1, 2002; July 1, 2004; October 1, 2006.

99-01.3-08-15. Tournaments. Except as provided by this section, an organization shall conduct a twenty-one tournament according to this chapter. These rules must be disclosed to players:

1. An organization shall charge a player an entry fee and provide the player a fixed number of no-value chips. The cumulative entry fee, including rebuys or add-ons, for an entire tournament cannot exceed two hundred dollars per player. An organization may allow a player to rebuy or add-on additional chips during a tournament by paying an additional amount which may be less than or equal to the original entry fee. An entry fee has no relationship to the number of chips issued to

the player. The chips have no cash redemption value. An organization shall maintain a register of players and their entry fee.

2. An organization may assign a player one or two betting spaces. An organization may use a rotating button to signify the order of betting. If a button is used, it must move clockwise one position after each hand. The organization shall set the time or number of shoes or hands to be played.
3. A player may not move from table to table, temporarily stop playing, remove chips from on top of a table, or transfer chips to or from another player. An organization shall set a minimum bet limit and may set a maximum bet limit based on a number of chips. A bet must be made on each hand. A player may not cash out before the end of play unless the player withdraws.
4. An organization may advance players with the most number of chips from each preliminary round to the next round or championship round. A player with the most number of chips, based on preliminary rounds or a championship round, wins. An organization may award a prize to the winning player of each preliminary round. However, if two players remain in the tournament, they may agree to split the prize rather than finish the tournament. A cash or merchandise prize may be awarded.

99-01.3-08-16. Recordkeeping. Records must include and be retained for three years from the end of the quarter in which the activity was reported, unless otherwise provided by rule:

1. For each day's activity:
 - a. The starting and ending cash and chip banks and IOU records according to section 99-01.3-03-06;
 - b. Drop box cash and values of fill and credit slips of each table;
 - c. For a tournament, prize register according to section 99-01.3-03-07 and record of win according to section 99-01.3-03-08;
 - d. A summary of gross proceeds, prizes, adjusted gross proceeds, cash profit, cash long or short, and bank deposit. The summaries of all twenty-one activity for a quarter must reconcile to the tax return; and

- e. For a video surveillance system, dealer percent-of-hold information and daily review log that must be retained for one year from the end of the quarter of the activity.
- 2. Inventory records according to subsections 4 and 5 of section 99-01.3-03-09.
- 3. The cash profit defined in subdivision h of subsection 6 of section 99-01.3-02-01, verification of the amount deposited according to a bank statement, and an audit of the game's activity according to section 99-01.3-03-10.
- 4. The count and reconciliation of cash banks and casino and betting chips according to subsection 6 of section 99-01.3-03-09.
